BULKHEAD-MOUNT POWER & SAILBOATS

Protection cover

OVERVIEW

The C10 range of compasses is a versatile class B bulkhead mount compass suitable for both commercial and leisure vessels. The compass is available in two sizes; 85mm and 100mm diameter cards. The conical card design allows a wide range of viewing angles and the inbuilt clinometer makes this compass a popular choice for sailing vessels.

The compass features a fairly wide flange so it can be a good choice when replacing an existing compass - the flange sizes allows installation where a large aperture has already been cut or can be used to cover fade marks on the bulkhead. The compass is available in black with dual voltage illumination as standard

FEATURES

85mm conical card

5° graduation
