Bracket Mount Wheelmark/SOLAS compass

## C8-0027 BRACKET-MOUNT POWER & WORKBOAT

### ROOFLINE INSTALLATION

## OVERVIEW

The C8-0027 bracket mount compass is one of our most popular and versatile workboat compasses. The compass is based on a vertical bulkhead style of compass so can be viewed from a wider range of angles.

In particular, this feature allows the compass to be mounted above eye line and thus the compass can be mounted from the wheel house deck head or roofline. This can be advantage when space is at a premium or when magnetic interference precludes mounting a magnetic compass on the console.

The 100mm conical card provides good clarity at long distance making this compass suitable for a wide range of wheel house configurations on small to medium sized workboats.

## FEATURES

100mm conical card

5° graduation

Deck shoe mounting

12/24 V lighting

Individual MED/SOLAS certificate included

100% Repairable

Exclusive 5 year warranty

## APPROVALS

Directive 2014/90/EC on marine equipment
