CLOCKS & METEOROLOGY

H72D GOLD NAUTICAL HYGROMETER

OVERVIEW

With a base of 72mm the Minor 72 is the smallest instrument produced by Autonautic. The range comprises of four instruments; clock, barometer, thermometer and hygrometer. Each is available in four styles; white dial with either gold plate, chrome and matt black or a black dial with chrome finish - this gives sixteen instruments in total.

These instruments are ideal for smaller craft where space is at a premium but it is still desirable to carry a full set of meteorological instruments and would also make an attractive addition to any caravan or motorhome due to its 18-carat gold finish.

This range of instruments are also suitable for inclusion in custom made panels or weather stations. Alternatively, we have a range of pre-assembled weather stations listed in our weather station section.
