SKU T72N

CLOCKS & METEOROLOGY
**T72N BLACK NAUTICAL
THERMOMETER**

OVERVIEW

With a base of 72mm the Minor 72 is the smallest instrument produced by Autonautic. The range comprises of four instruments; clock, barometer, thermometer and hygrometer. Each is available in four styles; white dial with either gold plate, chrome and matt black or a black dial with chrome finish - this gives sixteen instruments in total.

These instruments are ideal for smaller craft where space is at a premium but it is still desirable to carry a full set of meteorological instruments and would also make an attractive addition to any caravan or motorhome.

This range of instruments are also suitable for inclusion in custom made panels or weather stations. Alternatively, we have a range of pre-assembled weather stations listed in our weather station section.

SPECIFICATIONS

- **TEMPERATURE RANGE:** -20° / +60°C
- **BLACK OVEN PAINTED ALUMINIUM**
- **MINERAL GLASS**
