SKU TAX-00122

Boxed Mount

# TAX-00122 BOXED PELORUS MOUNT

## OVERVIEW

On larger vessels the pelorus can be an aid to watch officers for predicting crossing situations and avoiding collisions. The instrument is also useful for checking current position, for instance, in determining the moment at which an aid to navigation is broad on the beam or measuring pairs of relative bearings which can be used to determine distance off and distance abeam of a navigational aid.

In traditional navigation the pelorus can be used to determine current position by plotting 3 bearings of known objects or checking current heading in relation to sun or stars.

The pelorus is also an invaluable tool for Compass adjusters - compass deviation can be determined by comparing compass reading to the sun's azimuth or known bearings of distant objects such as navigation aids or lighthouses.

## FEATURES

125mm card size

1° graduation

Gimballed

Sighting Vanes

5 exclusive years of warranty

Individual MED/SOLAS certificate included

## APPROVALS

ISO 9001 certified management system

Member of CISQ Federation

CERTIFIED MANAGEMENT SYSTEM  
**ISO 9001**
