# TAX-00123 BRACKET-MOUNT PELORUS

## OVERVIEW

The bracket mount pelorus (TAX-00123) comes with two mounting plates, one to be affixed with two screws at the desired installation location, the other is fixed within the storage box for safe stowage. The pelorus can be taken from its storage box and be quickly mounted on the fixed mounting plate via a thumb screw. Additional mounting plates can be supplied if additional mounting positions are required. The plywood storage box size is W:245 x D:245 x H:140mm and is finished in natural wood tones.

The Autonautic pelorus consists of a gimballed suspension system comprising of a gimbal ring, weight and arrest. Mounted on the gimbal assembly is the 125mm diameter card, sun shadow pin and two sighting vanes.
